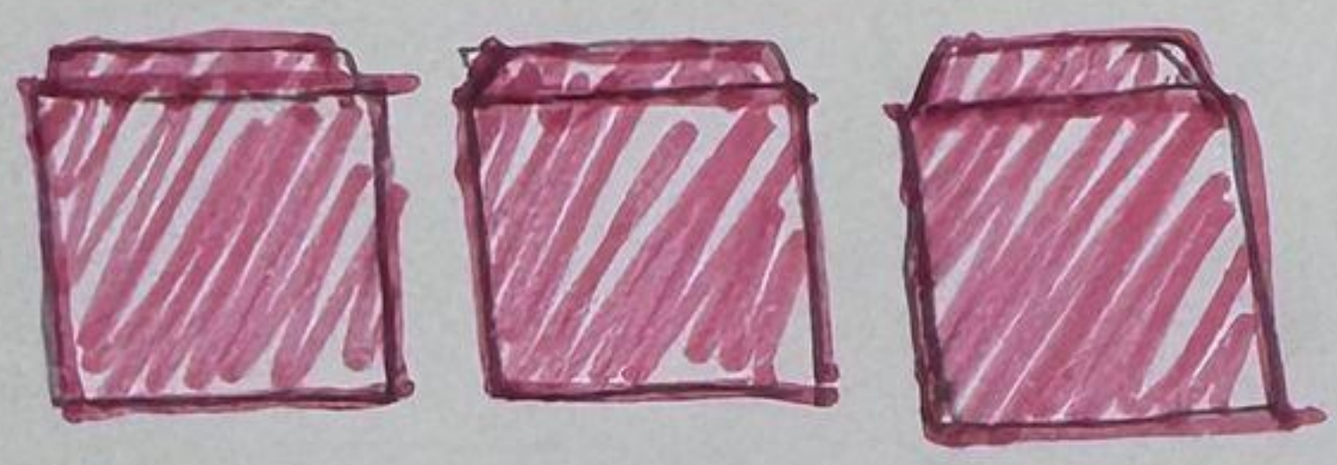
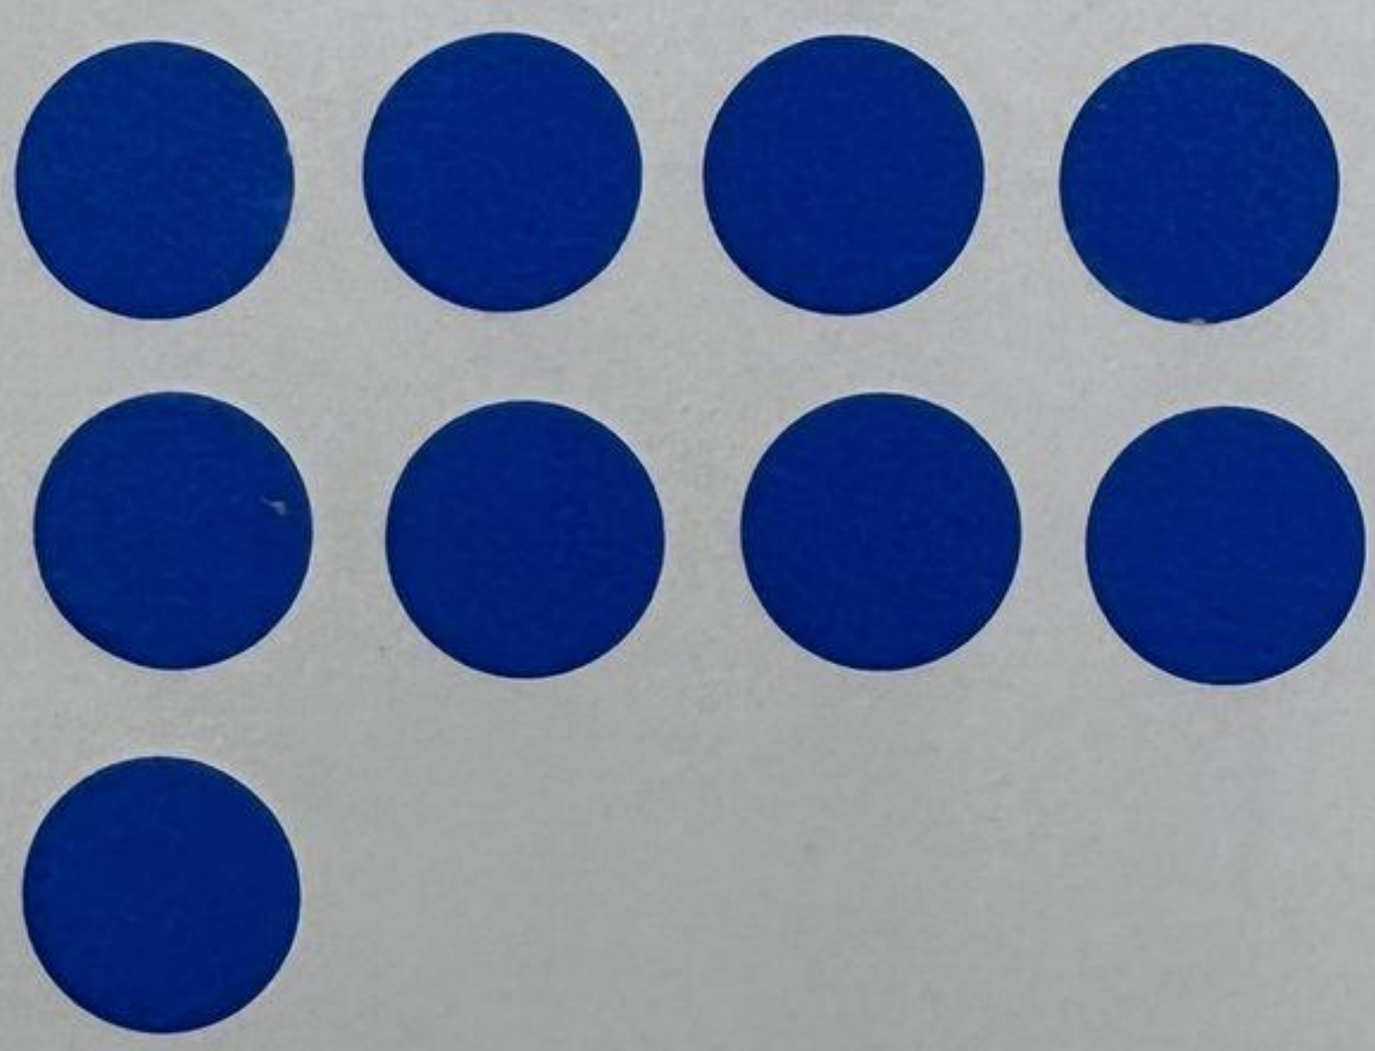
tally marks

7 + 4 = 11

cubes or objects



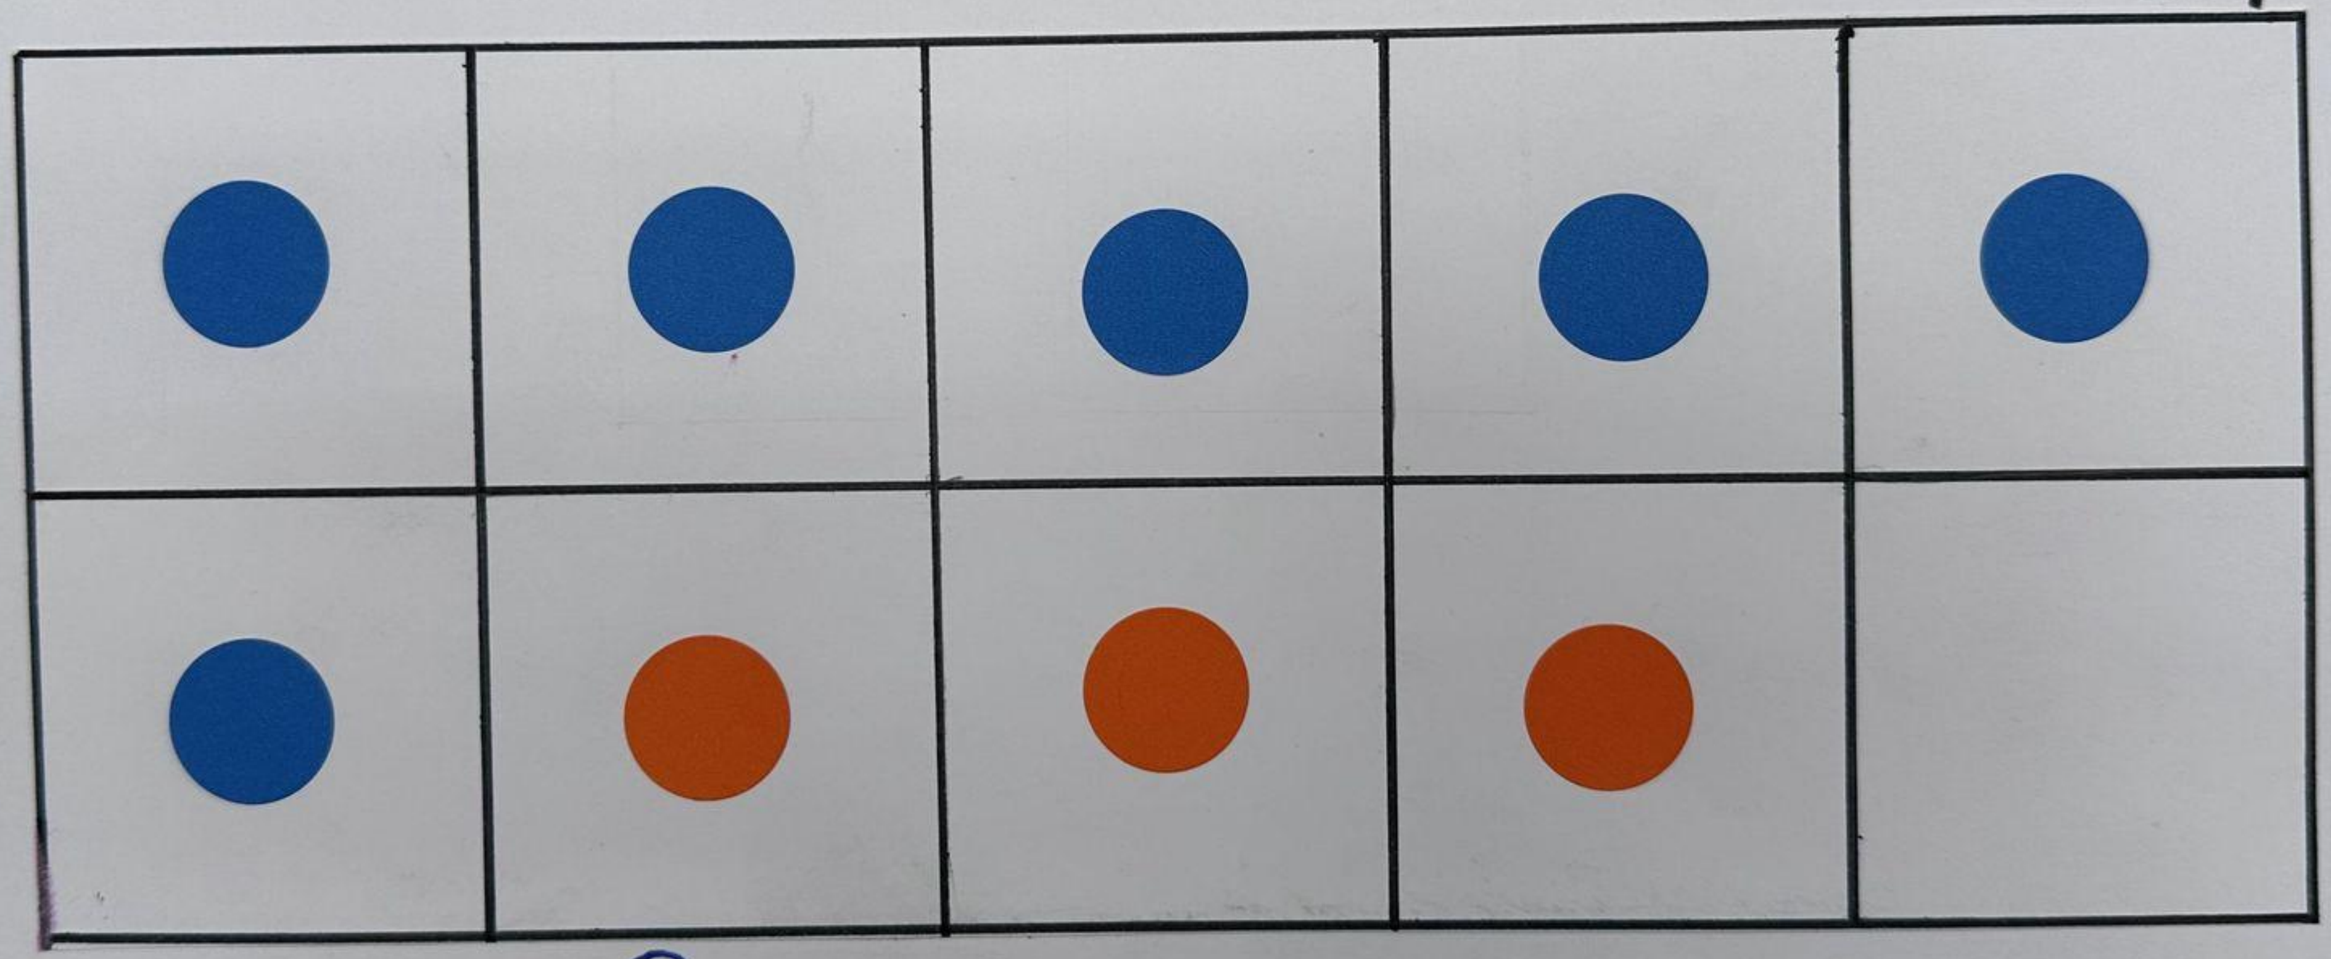
3



9

3 + 9 = 12

Ten-Frame Strategy



$6 + 3 = 9$

making groups

→ groups of 5

↳ 8 groups of 5 and 2 left over = 42

Even and Odd Numbers

Even numbers always end in:

0 2 4 6 8

Odd numbers always end in:

1 3 5 7 9

An even number can be split into ***two equal*** *groups.*

Cannot *be split into two equal groups.*

Let's practice: even or odd?
