

Name: _____ Date: _____

My Picture

Use    and .

Make a picture.

Tell about the figures you used.

Focus | Children create pictures using 2-D figures and describe their work.

Name: _____ Date: _____

Where Am I?

Look in your classroom.
Find an example of each figure.
Tell where you saw each one.

rectangle square triangle hexagon octagon pentagon circle

What I Saw	It Looks Like	Where I Saw It
book cover	a rectangle	inside my desk

Focus | Children look for geometric figures in the classroom and tell where each is located.

Name: _____ Date: _____

What Is in the Bag?

There are 3 figures in a bag.
The total number of sides is 13.

What could the figures be?
Show your strategy.

What other figures could they be?

Focus | Children choose a strategy to find 3 figures with a total number of 13 sides.

Name: _____ Date: _____

Another 3 in the Bag

There are 3 figures in a bag.
The total number of vertices is 12.

What could the figures be?
Show your strategy.

What other figures could they be?

FOCUS

Children choose a strategy to find 3 figures with a total number of 12 vertices.

HOME CONNECTION

With your child, go on a vertex (corner) hunt in your home. Look for a geometric figure and count its corners. Ask: "How can we find another figure with the same number of corners?"

Name: _____ Date: _____

Draw Matching Parts

Draw the matching parts to finish the pictures.

	
	My Picture 

Focus

Children draw a "mirror image" to complete each symmetrical figure.

HOME CONNECTION

Create 3 to 6 symmetrical figures by folding paper in half and cutting. Cut each figure in half along the fold line. Mix the pieces and pick one. Ask your child to find its matching part. Have your child pair the rest of the pieces.

Name: _____ Date: _____

Symmetry in Letters

Circle the letters that show symmetry.
Check using a Mira.

O G V C M
P A J B R X

Where would you place a Mira on MOM to show symmetry?
Use  red .

Draw a line where you would put the Mira.

MOM

Think of another word that shows symmetry. _____
How can you tell it shows symmetry?

FOCUS

Children identify capital letters that show symmetry and use a Mira to check. Then they investigate some words that show symmetry.

HOME CONNECTION

Print your child's name in block letters. With your child, check if the name has symmetry. Look for symmetry in names of other family members.

A Quilt

Follow the directions on page 233 to complete the quilt.

HOME CONNECTION

Focus

Children follow directions to complete a quilt.

With your child, take turns describing each of the quilt blocks on page 232. Ask your child to describe geometric designs in your home.

Finish the Quilt!

Part 1

Draw the matching part to finish quilt block 7.

Find the quilt block that has only a pentagon.

Draw a triangle on each edge of the pentagon.

What does the design look like? _____

How many vertices are there in this block? _____

Use figures to make your own design in the centre quilt block.

Tell what you used. _____

Part 2

Draw a repeating pattern on the border at the top and bottom of the quilt. Use just one figure. You can make it slide, flip, or turn.

Name two quilt blocks that have the same design.

_____ and _____

Start in Block 1. Go straight down two blocks.

Go one block to the right. Go up one block. Go one block to the left.

What is the number of the block you are in? _____

Name the figures you can find in that block.

Name: _____ Date: _____

My Journal

Tell what you learned about figures.

Use pictures, numbers, or words to show your thinking.

Focus | Children reflect on and record what they learned about 2-D geometric figures.
